

My Career Experience (CE)

2022 - Cycle 1

William H. Stokes
Web Production Assistant - People Site Team

What an Experience!

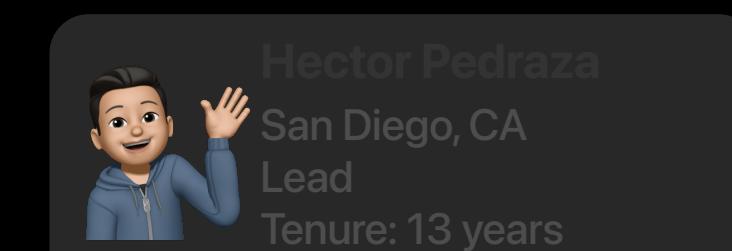

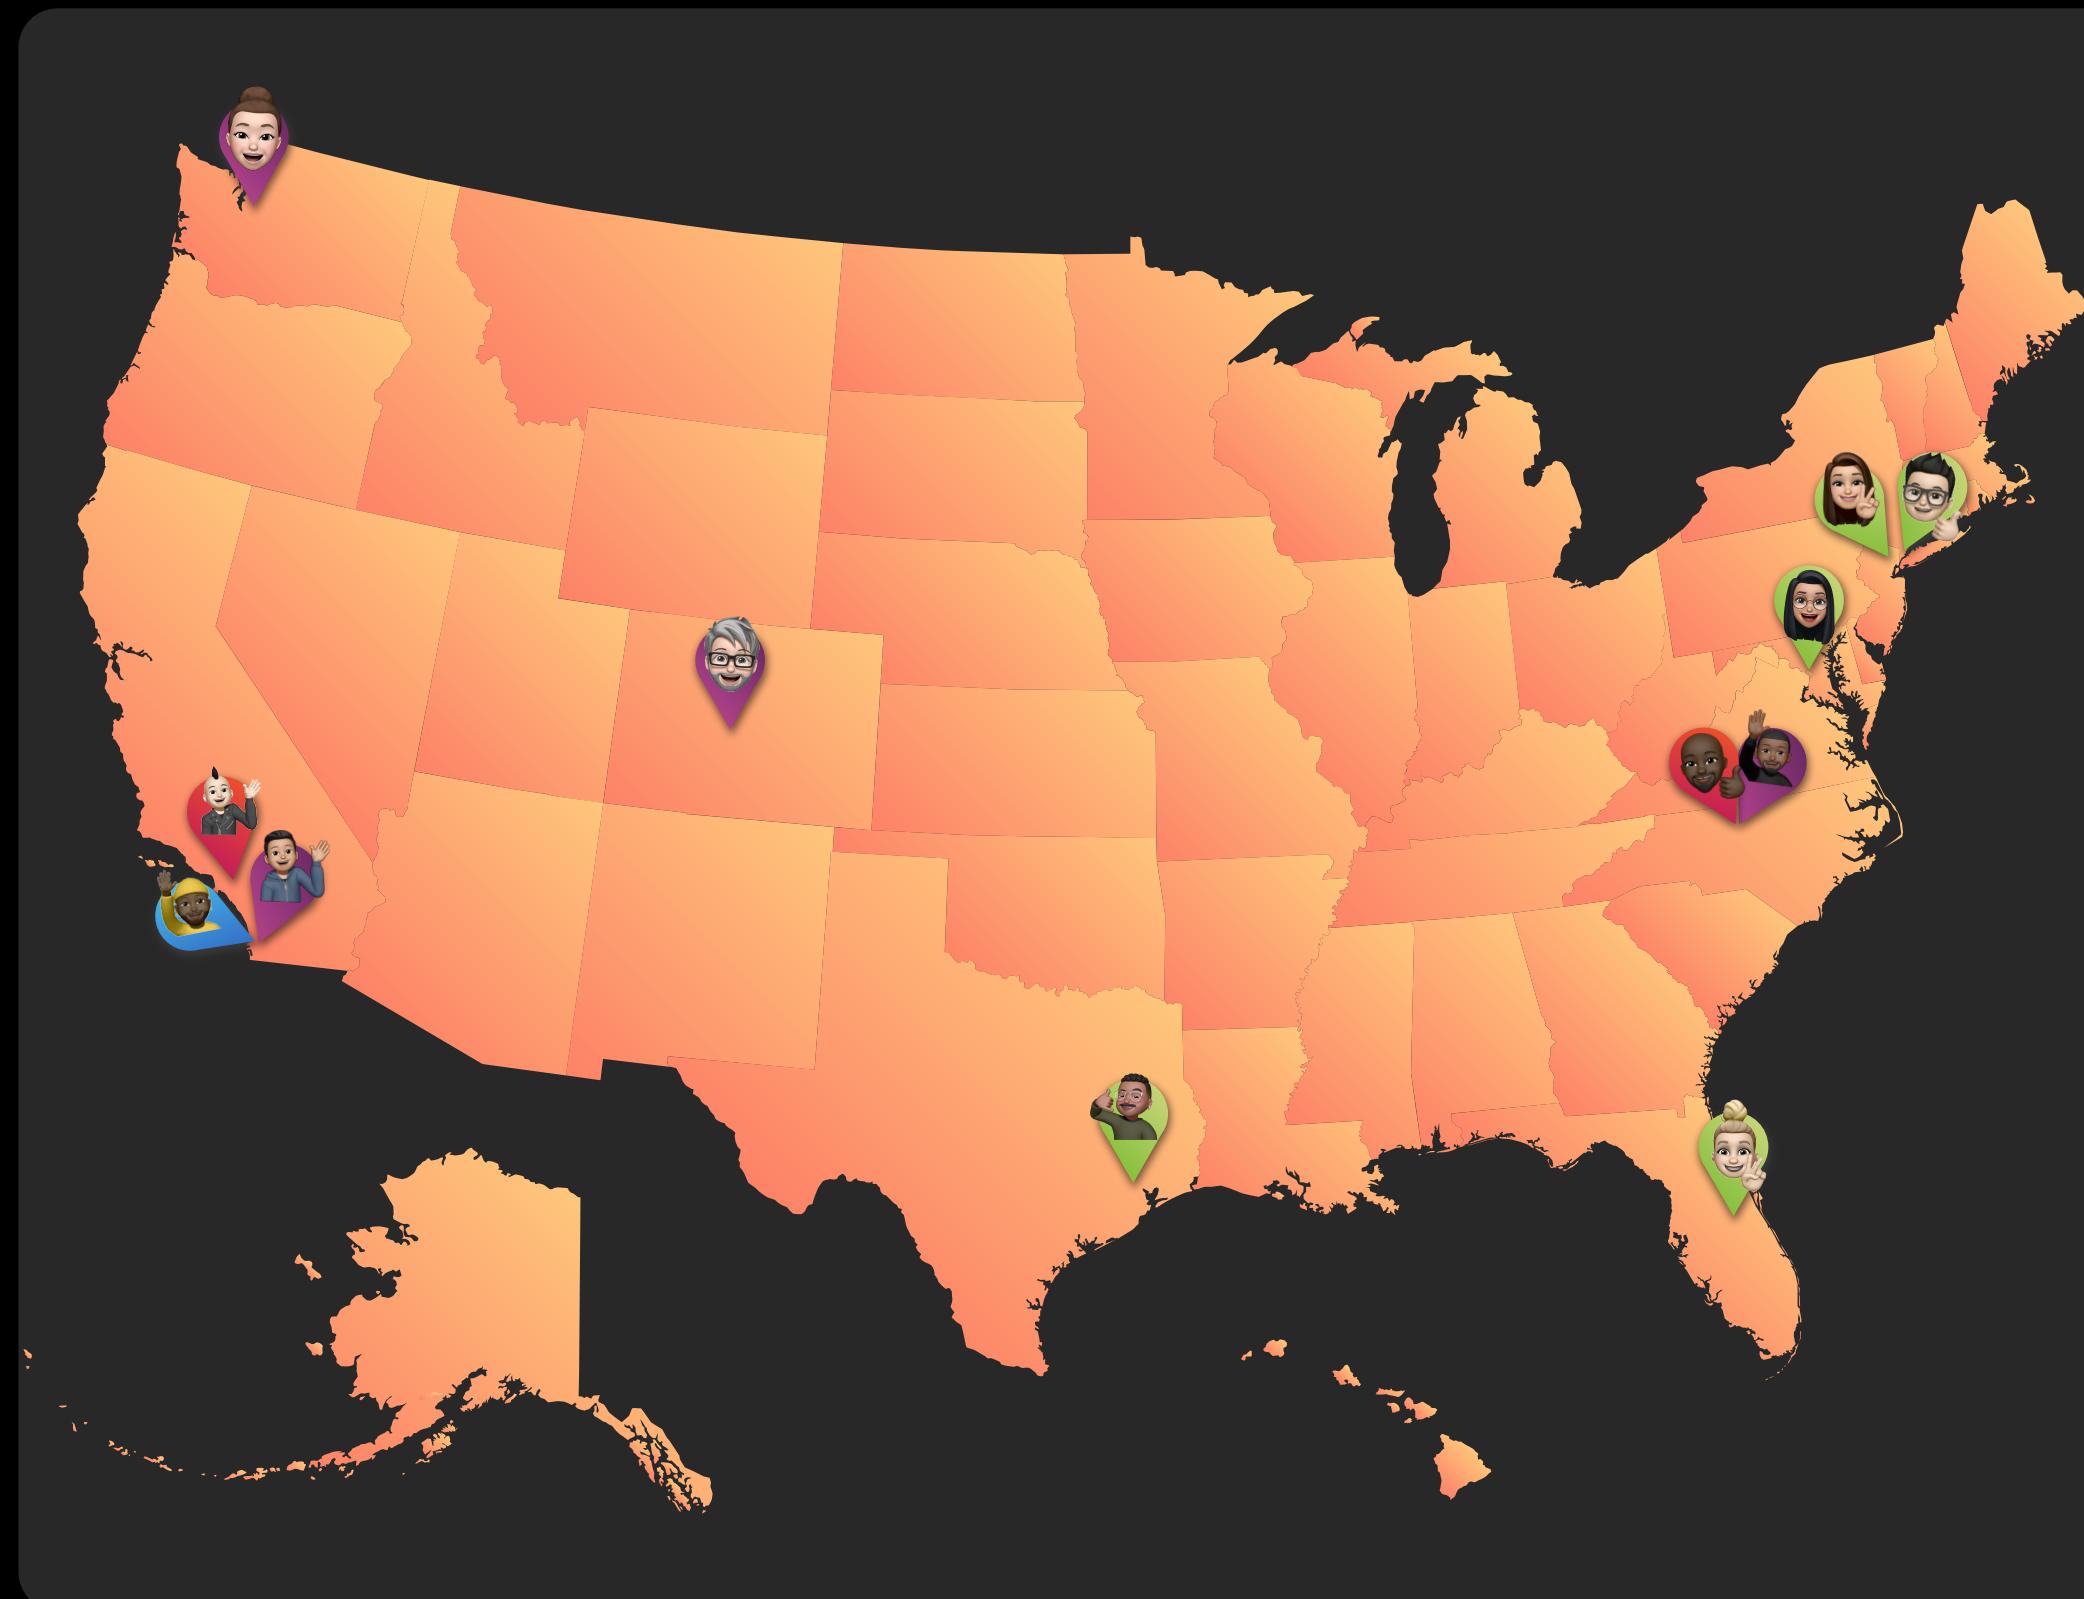

A CE is a great way to enhance your career here @Apple — you'll have the opportunity to contribute meaningful work to something big, enhance your skillsets and build your resume!

Web Production Assistant

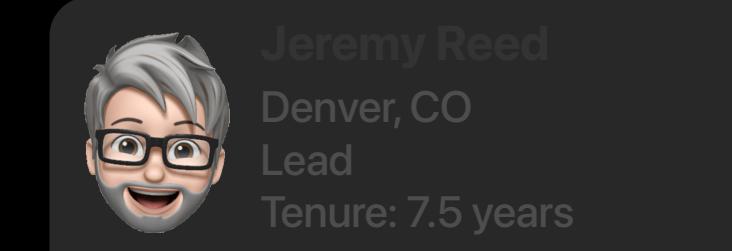

During my Career Experience, I worked with the Content/Production team to manage, update, and publish content using our CMS (Content Management System), Drupal. Some of the tasks were fairly straight-forward, while others needed a deeper degree of evaluation and project management. I had the opportunity to work with multiple partners across the wider People team and help to represent our site as a trusted and efficient form of communicating across Apple.

2022 Cycle 1 Employee Experience CE Team

Hector Pedraza
San Diego, CA
Lead
Tenure: 13 years

People Support

Tenure: 6 years

People Site

Raul Cuellar Villalobos
Burbank, CA
Creative Pro
Tenure: 6 years

People Site

There was a total of 12 CEs nationally. Each one of us made contributions to advance Apple's culture of excellence!
Talk to your leader about Growth & Development @Apple and be sure to utilize all of your available resources.

The People Site Team

I had the opportunity to work with an amazing group of people!

Things That I've Learned

- How to create copy decks (detailed outline of a policy or program page)
- How to write in Apple style
- Introduction to project management in Wrike
- How to use Drupal, one of Apple's CMSs (Content Management Systems)
- Collaborating across multiple teams

Plans to Maximize my CE

- Present the CE as a job, not just an “experience” on my resume
- Use the “skills” section of my resume to highlight knowledge used and obtained during my CE
- Keep open lines of communication with those that I’ve connected with during my CE (Networking is key)
- Prepare scenarios from my CE that would be helpful during an interview

Major Accomplishments

- Innovation of the auditing process for pages on the People Site
- Assisted with the revamp of multiple pages
 1. Leaving Apple Checklist (Voluntary, Involuntary, Managers)
 2. Provider Directory
- Build and stage a webpage from scratch (Manager's Checklist for an Involuntary Termination)
- Participated in the Q3'FY22 Employee Experience All-Hands Video for the Employee Experience team

Sites created

Manager's Checklist for an Involuntary Termination (audit, build from scratch, sent through localization (translation) for all languages)

Career Experience site (screenshot - this what not the type of projects I worked on during my CE)
